Customer Focused, Bonefish Driven
Portions of this presentation use non-GAAP financial information. Each of those portions is so noted, and a reconciliation of that non-GAAP information to comparable GAAP information is provided in a footnote or in the appendix at the end of this presentation. Annualized, pro forma, projected and estimated numbers are used for illustrative purpose only, are not forecasts and may not reflect actual results. This presentation also includes certain non-GAAP financial measures related to “tangible common equity”, “pre-provision net revenue”, “economic profit”, “RAROC” and certain financial measures excluding notable items, including merger-related charges. Notable items include certain revenue or expense items that may occur in a reporting period which management does not consider indicative of ongoing financial performance. Management believes it is useful for the investment community to consider financial metrics with and without notable items in order to enable a better understanding of company results, facilitate comparability of period-to-period financial results, and to evaluate and forecast those results. Although FHN has procedures in place to ensure that these measures are calculated using the appropriate GAAP or regulatory components, they have limitations as analytical tools and should not be considered in isolation, or as a substitute for analysis of results under GAAP. For more information on these calculations and to view the reconciliations to the most comparable GAAP measures, please refer to the appendix of this presentation.

This presentation contains forward-looking statements, which may include guidance, involving significant risks and uncertainties which will be identified by words such as “believe”, “expect”, “anticipate”, “intend”, “estimate”, “should”, “is likely”, “will”, “going forward” and other expressions that indicate future events and trends and may be followed by or reference cautionary statements. A number of factors could cause actual results to differ materially from those in the forward-looking statements. These factors are outlined in our recent earnings and other press releases and in more detail in the most current 10-Q and 10-K. FHN disclaims any obligation to update any such forward-looking statements or to publicly announce the result of any revisions to any of the forward-looking statements to reflect future events or developments.
Our Business Model Is Proven, Focused, and Better
